PSS - Polished stainless, SSS - Satin stainless.

KEYING INFORMATION

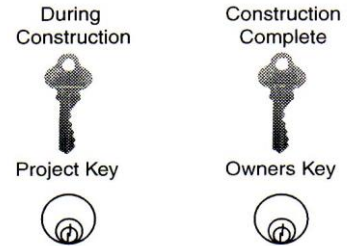

Keyed Alike Systems

This system allows group of locks to be operated by the same key to enhance convenience. e.g. a front and back door are operated by the same key.

Project Keyed Systems

This system allows contractors using a project key in each individual houses during its construction, and each individual house has its own keys. After completion of the building, the use of the owners key automatically cancels out the project key, consequently prevents entry by the contractors after completion.

GENERAL INFORMATION

Hinge Selection Chart:

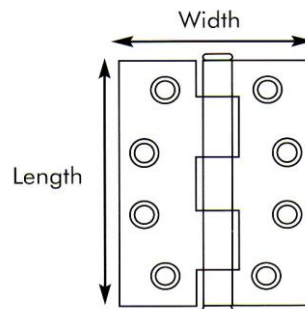

Door Thickness	Door Width	Recommended Hinge Selection
30 - 45mm	Under 900mm	2 x 100x75x2.5mm Internal Doors 3 x 100x75x2.5mm External Doors
30 - 45mm	Under 900mm	3 x 100x75x2.5mm 4 x 100x75x2.5mm
45 - 55mm	Under 1050mm	3 x 100x100x2.5mm 3 x 100x100x2.5mm 4 x 100x100x2.5mm

Doors receive heavy use or fitted with door closers, where the conditions put the hinges under more stress, it is recommended that an additional hinge be used.

General Information

Loose pin should not be used on exterior opening or security doors, in these circumstances for security reasons, fixed pin hinges should be used.

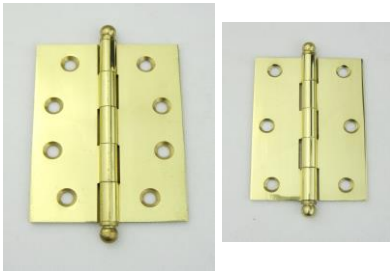

The first measurement of hinge is height, followed by the width and gauge. The height of the hinge is the length of the leaf, the width of the hinge is the length of the fully opened measurement across both leaves, the gauge of the hinge is the thickness of the material used.

We also manufacture hinges for special application, please contact us if you have a requirement for the hinge not list in this pamphlet or non-standard products.
